

Meeting Date	03.05.2026
Begin Time	15:00
End Time	16:00
Following 8 People Attended	Nina Salnikow, Hörmansdorfer Moritz, Sara Klasová, Oberhumer Dominik Laurids Aichmayr, Luca Boesso, Daniil Rabotnev, Sahar Saffi

Discussed Topics

Sparring Group challenges:

- merging 30x30m LST data with 10x10m satellite data
- how to use the OSM data

Our feedback:

- Nina: recommended using OSM Water data as a cooling indicator and suggested WU Cloud if Jupyter Hub limits are reached
- Moritz & Sara: shared insights on how we preprocessed data for model. We noticed differences in approaches (U-Net vs. XGBoost)
- Dominik: suggested using GitHub Issues to better organize and track project tasks

Our challenges:

- computational demands and managing large datasets
- incomplete OSM and tree cadaster data

Their feedback:

- Their coaches want a full pipeline(the whole process), not just a model.
➔ Is giving our data coaches our GitHub link enough? Or do we need to give them a specific file (like a .pickle file) at the end e.g.

Follow Up

Nina scrapes more data, Sara EDA improvements & label definition, Moritz improves ground truth definition in model, Dominik searches more literature

+ ask data coaches if Github repo is enough

Emergencies

No emergencies

Meeting Date	10.06.2026
Begin Time	15:00
End Time	15:50
Following 8 People Attended	Nina Salnikow, Hörmansdorfer Moritz, Sara Klasová, Oberhumer Dominik Laurids Aichmayr, Luca Boesso, Daniil Rabotnev, Sahar Saffi

Discussed Topics

➔ **Both groups sent an invite to our Data Coaches**

Themes discussed:

- Slides: both around 30 pages, feedback: not too complex, start from scratch -> nobody remembers or has the same context as we do
- Report: still in progress
- BEAM: not too detailed, else to gets too complicated
- Platform choice to send projects to Data Coach: both decided to use GitHub

Both have same challenges:

- incomplete OSM and tree cadaster data -> decided on validation methods and to only include more data is it betters the performance of the model
- accepted that we have limitations!

Follow Up

➔ sent Data Coach an online alternative Team's link for the presentation day
